

How to install Zoom videoconference software on a district PC.

1. Go into the Software Center by searching for it in the taskbar.

2. Select "Zoom Installer" from the list of available software and click install.
 - a. Please make sure to wait until the installation is complete before opening the program, otherwise the process will fail. This will take approximately 5 minutes.

3. Open the program from the desktop shortcut and enter the meeting ID you received in your email to access the web conference.
